Abstract – the main of of this is agriculture technology how the computers and information technology used
For security and software technology for agriculture information section

Index Terms – 1.agriculture in economy 2. SOFTWARE ENGINEIRNG information technology for agriculture
3. PAPER BASED computer security
 Security technology using normal paper based hand writing on paper based security
4. AGRRICULRE RURAL DEVELOPMENT
5.INFORMAITONT ECHNOLOGY IN HOSPITAL ADMINISTRATION
6 SEA LEVEL RISING ALERT

I. INTRODUCTION

Information technology in agriculture security technology agriculture in economy development India

2 . Software engineering in agriculture

Records generation the use of software engineering for for security careWith intelligence protection. The records era with synthetic intelligence for for security In health center the the synthetic intelligence with safety and health care Services,The records era with synthetic intelligence can supplyProper carrier improve the fine of health care offerings Enhance the good appropriate for security care on-line service With facts technology with artificial intelligence The artificial intelligence can useful for information protection And management and intelligence and safety with software program With .Internet java software program these may be in additionally beneficial For rural improvement medical institution management Precise generation with minimal fee.The research are data safety and bio informatics biomedical engineering The research location facts generation in health care Statistics security. Protection of software program cumber security. Artificial intelligence in Data Science for security using computer Artificial intelligence in medical institution and actual existence improve the lifestyles fashion Synthetic intelligence in health care the usage of intelligence Software program with .Net java security software We are able to utilize the software program for facts safety
Software can also useful for police intelligence and security

3. GOOD PAPER BASED HAND WRITNG FOR SECURITY

Hand written and voice reorganization software program can With software engineering python programming And asp. Net java programming languages.The synthetic intelligence software program with the aid of studies methodWith robotics in education, fitness care, police safetyAnd government management and agriculture statistics generation.This may carried out with synthetic intelligence with The bushy common sense set of rules 4

4 AGRICULTURE RURAL DEVELOPMENT ECONOMY DEVELOPMENT INDIA

For rural development hospital managementGood health technology with minimum price.
The research are information security and bio informatics biomedical engineeringThe research area information technology in health careInformation security.Protection of software cuber security.

5. INFORMATION TECHNOLOGY FOR HOSPITAL ADMINISTRATION

Artificial intelligence in hospital and real life improve the life styleArtificial intelligence in health care using intelligence Software with .net java security softwareWe can utilize the software for information security Software can also useful for police intelligence and securityHand written and voice reorganization software can With software engineering python programming And asp.net java programming languages. The artificial intelligence software by research methodologyWith robotics in education, health care, police securityAnd government administration and agriculture ieformation technology.

This can done with artificial intelligence with
The fuzzy logic algorithm

6. SEA LEVEL RISING AROUND THE WORLD EFFECTS CLIMATE AND NEAR SEA INDIA CITIES WORLD CITIES ARE SEA LEVEL SHOULD BE ALERT

The rising temperature on earth because of global warming it effects rains and mansoon And agriculture rising sea level around the world effect sea near cities will be Sink the sea level cities in India 8 cities Chennai Mumbai Vishakhapatnam kolkatta And around the world near sea level 80 cities are sinking in seal so alert because of sea level rising in year 2040 In year 2050 so that sea level should be note every time because global warming Agriculture production fresh water diereses and also good technique improve agriculture production In india world. the computer web technology usefull for weather Agriculture health security and also normally good printing paper hand writing Also digital Cameras also useful for security .
