**COUNTRY = INDIA**

ABSTRACT OR PAPER = Detail study, The causes of tobacco and Invented a product to replace tobacco.

Recently we all suffered from pandemic situation [covid-19] and on this time we all beware for our health and on this time many people died and as per the average 75% people were addicted towards tobacco and it's like product.

Because tobacco causes many diseases and people were known their result but then also they still consume tobacco. So by looking this I invented a healthy product which has same taste like tobacco same structure like tobacco as well as the consumption process is also similar.

In fact the amount of tobacco were taken it also decreased & increase immunity, And we all known that at this present time tobacco is becoming worldwide problem for our present & upcoming generation. Mostly now a days, Tobacco is directly affected to our youth.

That's why I tested my product over 1000+ those volunteers who consume 3-4 times tobacco in a day and we successful. And in 108 Indian science congress over 100+ scientist from all over the world give approve to my product.

It is not easy for me to make such revolutionary product. I gave my five years for this, and on this time period is failed many times but still I tries and finally I get success in my project.

For making our product I firstly find their oxidation state by reacting with some organic compounds and some non reacting chemical, and implemented many proteins and on particular time when smell come I captured and packed.

And it is a healthy product because in this nicotine like harmful substances are absent and some protein are present which can boost our immune system.

And I noticed that now a days it is a easy way to quit tobacco and tobacco like other harmful substances. And people easily adapt this and because of it same cost which has tobacco. So if people became to know that (A product which is present on market which has all common thing which has tobacco like taste, smell, consumption etc but it cannot cause any kind of diseases. And while doing our research is also become to know that those person who has around 400-500 sugar level after 1 month consuming our product it was decrease and come to 200-250 sugar level . And also good changes occur in our volunteers health.

So , this is our small initiative to replace such toxic substance TOBACCO.

Our product is very useful to many families and it saves many life and by this, It become very easy way to quit tobacco.

“BECAUSE EVERYONE IS IMPORTANT,  
EVERYONE’S LIFE IS IMPORTANT.  
WE ARE HUMANS,  
WE WORK FOR HUMANITY”

#### PRODUCT TRIALS REPORT

Our product was tested over 1000+ volunteers Over different age group who consume on an average 3-4 times tobacco in a day, In the form of chewing or in the form of smoking.

Here I provided some name of our volunteers, location and trials conclusion.

NAME	AGE	LOCATION
Kalikant jha	45	Silvassa
Abhishek jha	26	Virar
Lalit jha	44	Virar

Ajay singh	52	Silvassa
Hitesh davre	27	Velugam
Subhash bhanval	25	Velugam
Sanjay jha	41	Silvassa
Premji thakur	48	Silvassa
Manoj gupta	42	Silvassa
Nilesh davre	32	Velugam
Mahendra shinde	53	silvassa
Chandrama singh	45	Rokhali
Anu jha	44	Silvassa
Dehandra thakur	48	Silvassa
Sunil dubey	43	Silvassa
Sanjay gupta	41	Silvassa
kunaram	50	Saily
Kalpesh bhoya	27	Valugam
Ganesh gupta	28	Silvassa
Mohit yadav	24	Silvassa
Saroj jha	48	Silvassa
Dilip singh	52	Silvassa
Ratnesh singh	32	Silvassa
Satyam jaishwal	29	Silvassa
Satyendra maurya	38	Silvassa
Bhavik patel	42	Silvassa
Sonu shah	35	Silvassa
Hariom pandey	43	Silvassa
Manish mandal	26	Silvassa
Subham singh	32	Silvassa
Vaibhav pandey	29	Silvassa
Rupesh chaudhary	36	Silvassa
Mitesh singh	27	Silvassa
Vicky Parmar	25	Saily
Dipesh Yadav	29	Silvassa
Mohit patel	33	Silvassa
Vinay Tiwary	45	Silvassa

Ranjeet singh	43	Silvassa
Saurabh gujar	24	Silvassa
Hardik Yadav	39	Silvassa
Pankaj jha	46	Silvassa
Alok jha	32	Silvassa
Manish gupta	36	Silvassa
Chandan singh	41	Silvassa
Bablu jha	43	Silvassa

AND MANY MORE AROUND 1000+

BUT WE DON'T TESTED OR TRIED OUR PRODUCT ON **PRAGNENT WOMEN** AND PEOPLE WHO HAVING **HEART RELATED DISEASES**.

**QUESTION ASKED FROM EACH VOLUNTEERS:**

**1. IS our product was same in taste like tobacco?**

**ANSWER;** 95% VOLUNTEERS SAID YES

**2. Any kind if problem you faced after consuming our product.**

**ANSWER;** 100% VOLUNTEERS SAID NO

**3. You observe any kind of changes after consuming our product. It is good or bad?**

**ANSWER:** 94% said yes good changes occur or 6% said that they don't felt any changes.

**4. After consuming our product now how much time you consume tobacco in a day?**

**ANSWER:** NIL 0 OR 1 TIME IN A WEAK OR MONTH.

TIME PERIOD OF TRIALS =1 YEARS

In which 6 months for product testing on volunteers.s  
And 6 month for health analysis of volunteers.

AND ALSO IN 108 INDIAN SCIENCE CONGRESS WHICH IS HELD IN NAGPUR WHERE 100+ SCIENTIST FRON WORLD WIDE TESTED OR TASTED AND GIVE APPROVANCE TO MY PRODUCT.

THIS IS A SMALL INITIATIVE TO MAKE WORLD TOBBACCO FREE
